ABOUT

I am a Front-end Developer with a passion for creating testable and scalable applications from end-to-end.

I'm currently studying for a degree in software development and working as a developer (part-time) at Arsenal Tecnologia in Portugal. I also do freelance projects, from creating websites and mobile apps to developing systems for internal company use.

My current goal is to work full-time, with a team where I can learn and contribute with my Front-end expertise. I am a self-taught person, learning how to code better everyday and always open to opportunities to grow as a professional and as a person.

MAIN EXPERIENCES

Workana, Remote — Freelance Software Developer

Jul 2023 - Current

As a freelancer, i am having the opportunity to work on a variety of exciting projects, collaborating with clients from around the world, to deliver high-quality web development solutions.

Arsenal Tecnologia, Évora, Portugal — Front-end developer

Jan 2023 - Current

Arsenal is a software development company that operates in Brazil and Portugal. As a junior front-end developer, I contribute to the development of Evo, an application designed specifically for doctors to streamline patient visits. In my role, I focus on building the user interface and user experience for the new version of Evo. By utilizing my front-end development skills, I work closely with the team to create visually appealing and user-friendly designs.

PETROBRAS, Brazil — Engineer Officer

Feb 2017 - Jan 2023 (6 years)

PETROBRAS is one of the largest oil exploration and production companies in the world. As first engineer officer, I was team leader and managed the services of operation and maintenance of equipment in the engine room aboard the LPG ship Jorge Amado (Transpetro). Planning, checking, and acting to ensure continuous improvements and develop more efficient problem-solving strategies. One of my main responsibilities was to always provide a safe work environment to the crew with a collaborative, flexible, respectful attitude.
